## THE OBJECTS OF THE ASSOCIATION

The Association of the American Directory Publishers is composed of reputable City Directory Publishers, organized for the general advancement of the Directory business. Any person, corporation or firm engaged in business as owner and publisher of a City Directory in the United States or Canada, who shall qualify as competent to gather information and compile a City Directory and furnish satisfactory references, is eligible to membership.

The objects of the Association are:

First. The advancement of the Directory business and the improvement of Directories by the interchange of ideas and the exchange of experienced employees

Second. To provide protection to the public against fraudulent advertising schemes which operate under the name of Directories, and to drive unprincipled promoters of the same out of business.

Third. To provide permanent and profitable employment to competent, industrious and honest Directory canvassers and compilers.

Fourth. For the mutual protection and advancement of the established and prospective interests of all who may become members, by personal advice and assistance of members as may be mutually satisfactory, desirable or advisable, and by such other means as may, from time to time, be shown to be wise, proper and lawful.

**\$100.00 REWARD** will be paid by the Association for the arrest and conviction of any person or persons engaged in publishing, collecting or canvassing for any fraudulent or fake Directory.

# Introductory

---

Herewith is presented the Fifth Edition of Henderson's Lethbridge City Directory, which is the result of careful work in accordance with the latest and best known methods in directory publishing.

Possibly no other volume or catalogue of statistics could more accurately portray the city's expansion and progress, nor more minutely represent its industrial growth and development in every department.

The Miscellaneous Section in the front part of the volume has been compiled and revised from the latest records and statistics.

The Advertising Department, together with the Classified Directory, contains an alphabetical list of all articles made and sold in Lethbridge, and virtually makes it a city catalogue and forms a most complete buyer's guide.

## POPULATION OF LETHBRIDGE, 12,903

In submitting this estimate of Lethbridge's population we wish to express the stability that Lethbridge has shown in maintaining her population in spite of this, the third year in the Great World's War.

The Publishers wish it to be understood that their figures are to be regarded only as an estimate. THEY ARE NOT A CENSUS.

The Publishers desire to thank their patrons and the general public for the courtesy extended, at all times, to their representatives, and to say that they fully appreciate the confidence which the business and professional men of Lethbridge have always shown in their publications.

PART I

# Lethbridge, Alberta

---

Lethbridge, Alberta, is a city of 12,145 inhabitants, situated forty-five miles north of the international boundary line, 764 miles west of Winnipeg. It is a prairie city on the banks of the Old Man River, just east of the Canadian Rockies, on the Crow's Nest Division of the Canadian Pacific Railway, and is the commercial and agricultural centre and supply point of Southern Alberta and the Crow's Nest Pass coal fields. It is the centre of large coal mining operations. The development of coal mining in this vicinity is the largest in Canada, west of Nova Scotia.

Lethbridge is spoken of by the travelling public as being the most beautiful of all the prairie cities. It is clean and sanitary. Its well kept parks and boulevards merit the admiration of all. As the traveller steps off the train, the first thing that greets his view is a park or garden covering ten acres, or four blocks, in the centre of the city. By getting on the street cars and travelling eastward he passes through wide streets bordered by rows of trees and boulevards on each side, until he reaches Henderson Park, which covers 200 acres and contains a beautiful artificial lake nearly a mile long, on which there is sailing, rowing and swimming in summer, and skating in winter.

At present the city is served by one railway, the Canadian Pacific, but it is certain that with railway development in the province the time is not far distant when the Canadian Northern, Grand Trunk Pacific and the Great Northern Railways will be operating in and out of Lethbridge.

The plans of the first two companies mentioned embrace the construction of lines to this place. The present service of the C.P.R. consists of eight lines entering the city, and Lethbridge is district headquarters for six hundred miles of railway.

The street railway system, owned by the city, stretches over eleven miles, and there are two miles of paved roads.

The lighting system is by electricity, supplied by a municipally-owned power plant, which is one of the most up-to-date and economical in Western Canada, the fuel used being supplied by a municipally-owned mine within a stone's throw of the plant. This enables the city to sell electric current for lighting and industrial purposes at very attractive rates.

The telephone system embraces the latest models of automatic phones, and is owned and operated by the Alberta Government. The water supply comes from the Old Man River, which has its headwaters in the Canadian Rockies, and affords a never-failing supply of water. The water comes through an up-to-date filtration system, and is then forced up the banks of the river into large mains and distributed throughout the city. The water works are owned and operated by the city.

The city government of Lethbridge has been progressive. Lethbridge is the first city in Western Canada to adopt the Commission form of government. Three Commissioners with defined responsibilities, and giving their whole time to official duties, administer all the municipal affairs.

This city has a fine class of school buildings for the 2,100 pupils. The schools are all constructed of brick, with stone or cement foundations. They are equipped with all modern conveniences, and consist of four public schools, one Roman Catholic separate school, one manual training school, one kindergarten school, and one high school. Pupils from the Lethbridge schools have demonstrated the efficiency of the tuition provided by taking premier place in the provincial competitions.

The discovery of natural gas has lately provided another valuable attraction for Lethbridge. The city is well piped, the pressure is strong, the supply unfailing, the quality good and the cost to consumers very low.

This city is situated in the centre of a vast agricultural and coal mining area, and affords ample opportunities for the investor in various lines, such as mining, agriculture, dairying, milling clay products manufacturer, manufacture of flax products, soap manufacturing and various other lines.

Lethbridge commands the eastern entrance to the Crow's Nest Pass through the Rocky Mountains. Between the city and the mountains, for some seventy-five miles, stretches a fertile plain, the western border of the great prairies. Across this plain the mountains are easily visible from Lethbridge. Eastward the same wonderful prairie stretches to Winnipeg, and southward to the international boundary. The agricultural products of this vast and fertile prairie require an outlet to the Western United States, British Columbia and through the Pacific Coast ports to the world's markets. The most important channel for this commerce is through Lethbridge and the Crow's Nest Pass.

At Lethbridge, mills, elevators, factories, wholesale houses and stores required for the storage, manufacturing, marketing and shipping of this growing business are being provided as the traffic develops. The Canadian Pacific Railway completed its lines through

the Crow's Nest Pass to Vancouver in 1916. This route from Winnipeg to Vancouver through Lethbridge, and the Crow's Nest is shorter than the line through Calgary and the Kicking Horse Pass. The line through the Crow's Nest to the Kootenay and the Columbia Valley country of British Columbia and via Kingsgate to the States of Washington, Oregon and California now serves a large and growing traffic.

Fruit, produce, forest and mineral products from three localities, the imported merchandise intended for consumption by the rapidly increasing population of the great prairies, are finding Lethbridge the logical gateway and the most convenient point for storage, assembling, assorting, marketing and reshipping.

Lethbridge is likewise in command of a most important railway line to and from the United States via Coutts. The freer trade relations between Canada and the United States constantly promote the importance of this traffic. Lethbridge will also presently command the short line via Weyburn and Portal to and from Northwestern Canada and the Dakotas, Minnesota and the Central United States.

### **COAL MINING**

The coal mines within a radius of six miles from Lethbridge produce about four thousand tons of coal per day in the busy season. Coal for storage at prairie cities is mined steadily from June onwards, and the miners are busy right through until March or April.

### **AGRICULTURE**

Agriculture is making rapid progress in the districts surrounding Lethbridge. There have been adverse seasons through occasional shortage of rainfall, and the farmers have thoroughly learned the lessons regarding the proper cultivation required to meet these climatic conditions. The Canadian Government Experimental Farm, just outside the city limits, is under the competent management of Mr. W. H. Fairfield, whose great experience is always freely at the service of the farming community. Grain farming and live stock raising are carried on with great success on the prairie lands, much of which are still unoccupied and for sale at very low prices; while farming and stock raising and feeding operations on the 100,000 acres of irrigated land close to the city are also highly successful.

The grain crop in 1915 was phenomenal in volume. Some 39,000,000 bushels of grain, valued at over \$50,000,000, were shipped from the Lethbridge district in that year, the yields of wheat from individual farms averaging about 40 bushels per acre. The yields in 1916 have also been high, the average for wheat being 30 to 35 bushels per acre. The district holds the world's record for the production of wheat; in 1916 the Nobleford Farm, eighteen miles from Lethbridge, recorded a yield of 54,395 bushels from a thousand acres. The yields of barley and oats have also been prolific and, like the wheat, of the very highest quality.

The irrigated lands are largely planted to alfalfa, producing an average of  $4\frac{1}{4}$  to 5 tons per acre from three cuttings per season.

The Board of Trade is one of the most active bodies of its kind in Canada. It keeps the farming community and the business men in close touch with each other and does a great deal to further the interests of both.

---

## RECRUITING IN LETHBRIDGE

Out of a total population of 12,145, as ascertained by police census in November, 1916, the large number of 1,875 are citizens of Lethbridge who have joined His Majesty's Forces.

The following is a list of the men who have been recruited in Lethbridge:

Infantry .....	1,579
Artillery .....	676
Mounted .....	166
Engineers .....	136
Medical .....	35
	<hr/>
	2,592
Navy .....	15
	<hr/>
	2,607
